

# Salford Safeguarding Children Partnership

## Effective challenge and escalation

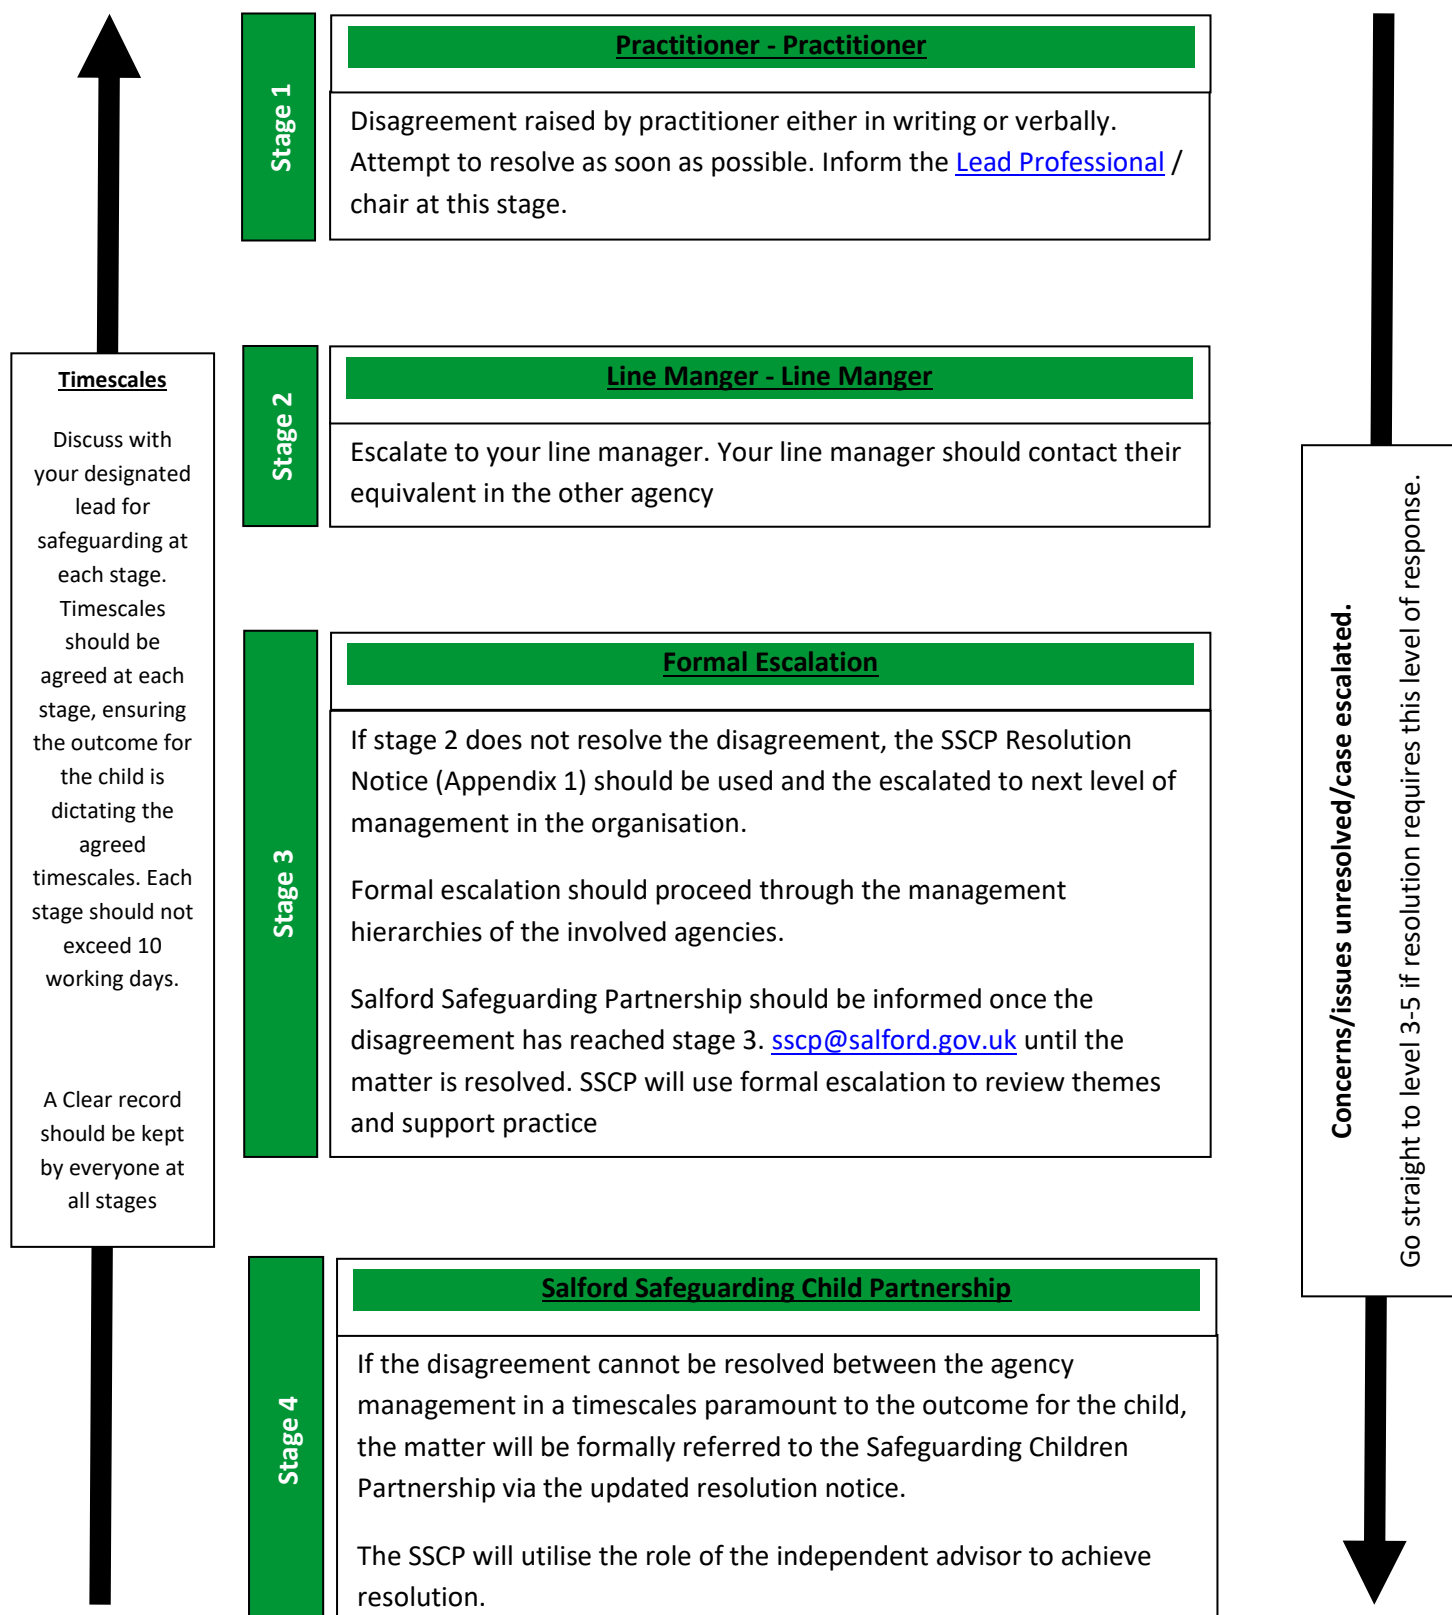

Effective partnership working is vital in order to ensure that outcomes for children and families are central to all assessment, planning and intervention. This includes the need to consider differing views and experiences which evidence the value of exchanging ideas and developing critical thinking in regards to how best to achieve improved outcomes. There will be times when disagreements occurred and require informal and possible lead to formal escalation. There needs to be a clear process in place to achieve and evidence this.

Principles in practice:

- Challenge is positive and should always be focused on the desired outcome for the child and family.
- The safety and wellbeing of the child is always paramount.
- It is the responsibility of each individual professional and agency to progress challenge if they are not in agreement with the outcome of any aspect of assessment, planning or intervention (any level of need and support)
- Challenge should be restorative and relationship based. Language should therefore be respectful and where possible discussions with the relevant practitioners should take place first.
- Challenge and escalation should be resolved in a timely manner.
- Challenge must be evidenced based and recorded on the child's file, including details of how the resolution improved outcomes for the child and/or family.
- If you have an immediate concern regarding the safety of a child, this should be reported to the Bridge.

Ensure your safeguarding lead is consulted with throughout the escalation process. Please attempt to resolve any disagreements informally, before initiating the Formal process. Inform the Lead Professional / IRO / child protection/ young person's plan coordinator or Chair of multi-agency meeting for information and monitoring.
